

Newman Leadership Academy Wellness Policy

Purpose

Newman Leadership Academy charter school (hereto referred to as NLA) is committed to the optimal development of every student. NLA believes that for students to have the opportunity to achieve personal, academic, developmental and social success, we need to create positive, safe and health-promoting learning environments at every level, in every setting, throughout the school year.

Research shows that two components, good nutrition and physical activity before, during and after the school day, are strongly correlated with positive student outcomes. For example, student participation in the U.S. Department of Agriculture's (USDA) School Breakfast Program is associated with higher grades and standardized test scores, lower absenteeism and better performance on cognitive tasks. Conversely, less-than-adequate consumption of specific foods including fruits, vegetables and dairy products, is associated with lower grades among students. In addition, students who are physically active through active transport to and from school, recess, physical activity breaks, high-quality physical education and extracurricular activities – do better academically. Finally, there is evidence that adequate hydration is associated with better cognitive performance.

NLA believes that health education should foster the knowledge, skills, and behaviors that students need in order to lead healthy, productive lives. NLA's health education program shall teach personal responsibility for one's own lifelong health, respect for and promotion of the health of others, the process of growth and development, and informed use of health-related information, products, and services.

Goals for NLA's health education program shall be designed to promote student wellness and shall be developed in accordance with Board policy. Such goals shall include, but not be limited to, goals for nutrition education and physical activity.

(cf. 5030 - Student Wellness) (cf. 6011 - Academic Standards) (cf. 6142.1 - Sexual Health and HIV/AIDS Prevention Education) (cf. 6142.7 - Physical Education)

The Board recognizes the link between student health and academic success, and believes that a Coordinated School Health and Wellness Program will foster the knowledge, skills and behaviors that individuals will need to lead healthy, productive lives. Therefore, to insure a high quality of life, an efficient use of internal and external resources and an effective program of interconnected experiences, the Principal or designee will address the health and wellness of the students, staff and community members of the district by using a Coordinated School Health Program model to promote healthy eating, physical activity, and comprehensive nutrition and health education for district students. The eight components of a coordinated school health program include:

- * Comprehensive School Health Education
- * Physical Education
- * Parent/Community Involvement
- * Healthful School Environment
- * Health Services

- * Counseling, Psychological and Social Services
- * Nutrition Service
- * Health Promotion for Staff

The WIC Reauthorization Act of 2004, Senate Bills 677 and 12, California Education Codes and California Department of Education Framework for Health and Physical Education have been used to develop administrative procedures for the implementation of this policy. The four goals of this policy, as recommended by the California Department of Education are:

1. The support of high-quality instructional programs in health education and physical education that provide students with the skills, knowledge, and confidence to develop and maintain active, healthy lifestyles.
2. The implementation of nutrition standards for all food and beverages sold or served on campus by any group or individual that will aid in the promotion of health and the reduction of childhood obesity.
3. Increased student participation in school meal programs so that no child goes hungry.
4. The creation of a school environment that supports the health of students in the school and community environments.

To help oversee, implement and evaluate this policy, a district wellness team, consisting of representatives from elementary, middle and high schools, district departments, parent groups, and community-based organizations will be established. In addition, school site wellness teams will be established to implement and integrate the wellness efforts of their school and to communicate their progress to the district wellness team.

(cf. 1020 - Youth Services) (cf. 3513.3 - Tobacco-Free Schools) (cf. 3514 - Environmental Safety) (cf. 3550 - Food Service/Child Nutrition Program) (cf. 3554 - Other Food Sales) (cf. 4020 - Drug and Alcohol-Free Workplace) (cf. 5131.6 - Alcohol and Other Drugs) (cf. 5131.63 - Steroids) (cf. 5141.23 - Infectious Disease Prevention) (cf. 5141.3 - Health Examinations) (cf. 5141.32 - Health Screening for School Entry) (cf. 5141.4 - Child Abuse Prevention and Reporting) (cf. 5141.6 - Student Health and Social Services) (cf. 5142 - Safety) (cf. 5146 - Married/Pregnant/Parenting Students) (cf. 6164.2 - Guidance/Counseling Services)

This policy outlines NLA's approach to ensuring environments and opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions.

School Health Council/Wellness Committee

Committee Role and Membership

The Principal shall encourage parents/guardians, students, food service employees, physical education teachers, school health professionals, Board members, school administrators, and members of the public to participate in the development, implementation, and periodic review and update of the district's student wellness policy. (42 USC 1758b).

To fulfill this requirement, the Principal designee may appoint a school health council or other school committee whose membership shall include representatives of these groups. He/she also may invite participation of other groups or individuals, such as health educators, curriculum directors, counselors, before- and after-school program staff, health practitioners, and/or others interested in school health issues.

The school health council/committee shall advise the district on health-related issues, activities, policies, and programs. At the discretion of the Principal or designee, the duties of the council/committee may also include the planning, implementation, and evaluation of activities to promote health within the school or community.

Leadership

The Principal will convene the Wellness Committee and facilitate development of and updates to the wellness policy, and will ensure each school's compliance with the policy. As necessary, the Committee Membership log will be updated to reflect members' names, titles, email address and role using the example table below. The designated official for oversight is the Principal.

Goals for Nutrition, Physical Activity and Other Wellness Activities

The Board shall adopt goals for nutrition promotion and education, physical activity, and other school-based activities that promote student wellness. NLA's nutrition education and physical education programs shall be based on research, shall be consistent with the expectations established in the state's curriculum frameworks and content standards, and shall be designed to build the skills and knowledge that all students need to maintain a healthy lifestyle.

The nutrition education program shall include, but is not limited to, information about the benefits of healthy eating for learning, disease prevention, weight management, and oral health. Nutrition education shall be provided as part of the health education program and, as appropriate, shall be integrated into other academic subjects in the regular educational program, before- and after-school programs, summer learning programs, and school garden programs.

To reinforce NLA's nutrition education program, the Board prohibits the marketing and advertising of non-nutritious foods and beverages through signage, vending machine fronts, logos, scoreboards, school supplies, advertisements in school publications, coupon or incentive programs, free give-aways, or other means.

All students shall be provided opportunities to be physically active on a regular basis. Opportunities for moderate to vigorous physical activity shall be provided through physical education and recess and may also be provided through school athletic programs, extracurricular programs, before- and after-school programs, summer learning programs, programs encouraging students to walk or bicycle to and from school, in-class physical activity breaks, and other structured and unstructured activities.

Professional development shall be regularly offered to health education and physical education teachers, coaches, activity supervisors, food services staff, and other staff as appropriate to enhance their health knowledge and skills.

The Principal may disseminate health information and/or the school's student wellness policy to parents/guardians through district or school newsletters, handouts, parent/guardian meetings, district and school web sites, and other communications. Outreach to parents/guardians shall emphasize the relationship between student health and academic performance.

In order to ensure that students have access to comprehensive health services, NLA may provide access to health services at or near district schools and/or may provide referrals to community resources. The Board recognizes that a safe, positive school environment is also conducive to students' physical and mental health and thus prohibits bullying and harassment of all students, including bullying on the basis of weight or health condition.

The Principal shall encourage staff to serve as positive role models for healthy eating and physical fitness. He/she shall promote work-site wellness programs and may provide opportunities for regular physical activity among employees.

Nutrition Guidelines for Foods Available at School

For all foods available on each campus during the school day, NLA shall adopt nutritional guidelines which are consistent with 42 USC 1773 and 1779 and federal regulations and which support the objectives of promoting student health and reducing childhood obesity. (42 USC 1758b).

In order to maximize the district's ability to provide nutritious meals and snacks, NLA shall participate in available federal school nutrition programs, including the National School Lunch and School Breakfast Programs and after-school snack programs, to the extent possible. When approved by the California Department of Education, NLA may sponsor a summer meal program.

The Principal shall provide access to free, potable water during meal times in the food service area in accordance with Education Code 38086 and 42 USC 1758, and shall encourage students' consumption of water by educating them about the health benefits of water and serving water in an appealing manner.

The Board believes that all foods and beverages sold to students at district schools, including those available outside the school's food services program, should support the health curriculum and promote optimal health. Nutritional standards adopted by the district for foods and beverages provided through student stores, vending machines, or other venues shall meet or exceed state and federal nutritional standards.

The Principal shall encourage school organizations to use healthy food items or non-food items for fundraising purposes. He/she also shall encourage school staff to avoid the use of non-nutritious foods as a reward for students' academic performance, accomplishments, or classroom behavior.

School staff shall encourage parents/guardians or other volunteers to support the district's nutrition education program by considering nutritional quality when selecting any snacks which they may donate for occasional class parties. Class parties or celebrations shall be held after the lunch period when possible.

PROGRAM IMPLEMENTATION AND EVALUATION

The Principal shall ensure that each school site complies with this policy. (42 USC 1758b).

The Principal shall assess the implementation and effectiveness of this policy at least once every two years. The assessment shall include the extent to NLA is in compliance with this policy, the extent to which this policy compares to model wellness policies available from the U.S. Department of Agriculture, and a description of the progress made in attaining the goals of the wellness policy. (42 USC 1758b).

The Board and the Principal shall establish indicators that will be used to measure the implementation and effectiveness of the district activities related to student wellness. Such indicators may include, but are not limited to:

1. Descriptions of the school's nutrition education, physical education, and health education curricula and the extent to which they align with state academic content standards and legal requirements.
2. An analysis of the nutritional content of school meals and snacks served in the program, based on a sample of menus and production records.
3. Student participation rates in all school meal and/or snack programs, including the number of students enrolled in the free and reduced-price meals program compared to the number of students eligible for that program.
4. Extent to which foods sold on campus outside the food services program, such as through vending machines, student stores, or fundraisers, comply with nutritional standards.
5. Results of the state's physical fitness test at applicable grade levels
6. Number of minutes of physical education offered at each grade span, and the estimated percentage of class time spent in moderate to vigorous physical activity.
7. A description of district efforts to provide additional opportunities for physical activity outside of the physical education program.
8. A description of other districtwide or school-based wellness activities offered, including the number of sites and/or students participating, as appropriate.

The Principal shall invite feedback on school wellness activities from food service personnel, school administrators, the school health council, parents/guardians, students, teachers, before- and after-school program staff, and/or other appropriate persons. As feasible, the assessment report may include a comparison of results across multiple years, a comparison of school data with county, statewide, or national data, and/or a comparison of wellness data with other student outcomes such as academic indicators or student discipline rates.

The Principal shall inform and update the public, including parents/ guardians, students, and others in the community, about the content and implementation of this policy and assessment results. In addition, the assessment results shall be submitted to the Board for the purposes of evaluating policy and practice, recognizing accomplishments, and making policy adjustments as needed to focus district resources and efforts on actions that are most likely to make a positive impact on student health and achievement.

Posting Requirements

NLA shall post the policies and regulations on nutrition and physical activity in public view within all school cafeterias or in other central eating areas. (Education Code 49432).

Nutrition Guidelines for Reimbursable Meals

Foods and beverages provided through federally reimbursable school meal programs shall meet or exceed federal regulations and guidance issued pursuant to 42 USC 1758(f)(1), 1766(a), and 1779(a) and (b), as they apply to schools. (42 USC 1751 Note)

(cf. 3553 -Free and Reduced Price Meals)

The Principal or designee shall provide periodic reports to the Board regarding the implementation and effectiveness of the district's health education program.

(cf. 0500 - Accountability)
